

DYNAPAC ECO SAVE

SUSTAINABLE COMPACTION

At Dynapac we strive to work in harmony with the environment. Many of our various solutions are beneficial not only for our planet but for our customers as well.

As our next step in development of sustainable solutions, we are now introducing the EcoSave function. Working in harmony with our currently existing EcoMode, the EcoSave function will take sustainable compaction one step further by automatically shutting down the engine after a pre-set time limit chosen by the operator. Whenever it is time to proceed the machine will do so without any delay. EcoSave will help you to further reduce excessive runtime saving both environment and fuel.

Save up to 300 l of fuel per machine and year

Save up to €600 per machine and year

Reduce your overall CO₂ emissions

CA SOIL ROLLERS

CC TANDEM ASPHALT ROLLERS

CX PIVOT ASPHALT ROLLERS

CS STEEL DRUM ROLLERS

ECOSAVE IS AVAILABLE ON:

SOIL ROLLERS	CA1500 - CA6500
TANDEM ASPHALT ROLLERS	CC2200 VI - CC6200 VI*
STEEL DRUM ROLLERS	CS1400 VI
PIVOT ASPHALT ROLLERS	CX8 & CX9*

*Includes combi and oscillation models.

OPERATOR CO-OPERATION

Dynapac's Eco solutions are designed to maximize efficiency and minimize excessive runtime while working seamlessly with the operator. The EcoSave timer for automatic shutdown of the engine is easily customizable, letting the operator choose between a wide range of pre-set timers or to shut the function off completely.

During both idle mode and engine shutdown, vital functions like the lights and rotating beacon can still be active, as well as the display and radio. Whenever the operator decides that it is time to proceed, the machine responds instantly without any delay.
