

Dynapac Paving MasterClass returns bigger and better in 2022

Dynapac Asia Pacific is proud to bring the 2nd “Dynapac Paving MasterClass” to Bangkok, Thailand. A Dynapac initiative for construction machinery operators, the goal is to create a cohesive environment where operators can efficiently and effectively operate Dynapac equipment, with the highest safety standards.

On Nov. 1, 2022, Dynapac in collaboration with Pin Siam Co. Ltd, invited 170 operators to participate in this exclusive event.

The Paving MasterClass event focused on the advance training of Dynapac equipment and provided a refresher course on best practice guidelines. Event attendees were also given the opportunity to demo the Dynapac SD2500CS paver and network with fellow industry professionals.

Ihab Eldessouky, Regional General Manager for Dynapac Asia Pacific said: “We are very excited to resume our Paving MasterClass after the pandemic and are thankful for this opportunity to put together this event with Pin Siam.”

“Corporate Social Responsibility (CSR) has never been more prominent on our regional agenda than it is today. We believe in equipping our operators with the right skills and safety practices. We hope to create an exclusive network to connect operators across Thailand and to provide a cohesive environment to support and celebrate what they do. We want this event to be a platform where they can network within the community, improve, and share knowledge.”

“We believe this hands-on experience will empower our operators to learn the different features of our paving equipment; to realize the full potential of Dynapac pavers and how we (Dynapac) can support our operators in building safe roads for the Thai community.”

Alongside the guidance of our certified trainers, this event endeavors to create a tight-knit community for our Dynapac operators, who play a key role as the driver of our Paver machines.
